Engineering Maths (I)

Course Code: COM108

Credits: 4

Semester: 2021 September

Staff teaching the module: Liu Mei Feng

Email: meifeng@xmu.edu.my

Office: A4 - R468

Prerequisites: None

Summary of Content

Functions, Limits and Continuity, Derivatives, Applications of Derivatives, Definite Integral, Applications of Integrals, Techniques of Integration, Order Differential Equations

Learning Outcomes:

Upon completion of the course, students should be able to

1. Apply the concepts of single variable calculus.
2. Compute limits, derivatives and integrals using appropriate methods.
3. Determine a suitable method in single variable calculus to solve various related problems.

Method of Assessment

Coursework	20%
Midterm	30%
Final Examination	50%
