G0251 FOUNDATION OF BUSINESS ANALYTICS
TUTORIAL 6

Prepared by:
Sulfeeza binti Mohd Drus
School of Economics and Management (SEM)

Question 1:

Define the following terms and give an example of each:

a) Mean
b) Median
c) Mode
d) Range
e) Standard Deviation

Question 2:

The following are the test scores of 10 students in a math exam:

45, 50, 55, 60, 60, 65, 70, 75, 80, 85

a) Find the mean score.
b) Find the median score.
c) Find the mode score (if any).

Question 3:

The average monthly salary of employees in a company is $4,000, with a median of $3,500.

What does this tell you about the salary distribution?

Question 4:

The heights (in cm) of five students are: 160, 165, 170, 175, 180.

a) Find the range.
b) Find the variance.
c) Find the standard deviation.

Question 5:

Two classes took a test.

Class A: Mean score = 75, Standard Deviation = 5

Class B: Mean score = 75, Standard Deviation = 15

Which class has more variation in scores? Explain.
