Xiamen University Malaysia - EEE221 Signals and Systems

Quiz 2: Laplace Transform (April 2026) Time: 30 minutes

Name [redacted] Student ID [redacted]

Signature [redacted]

1. Find the Laplace transform of f(t) = t e^(-3t) u(t). [4 marks]

2. Find the inverse Laplace transform of F(s) = (s + 2) / (s^2 + 4s + 13). [6 marks]

3. Solve y'' + 3y' + 2y = u(t) with y(0) = 0, y'(0) = 0. [10 marks]
