Component Title	Lab report				Percentage (%)	100	
Criteria	**Score and Descriptors**					**Weight (%)**	**Marks**
	Excellent (5)	**Good (4)**	**Average (3)**	**Need Improvement (2)**	**Poor (1)**		
Abstract	Abstract contains reference to all correct aspects of carrying out the experiment and the results, excellent written	Abstract contains reference to all major aspects of carrying out the experiment and the results, well written	Abstract references most of the major aspects of the experiment, some minor details are missing	Abstract misses one or more major aspects of carrying out the experiment or the results	Several major aspects of the experiment are missing, student displays a lack of understanding about how to write an abstract	1	
Objective	The objectives of the experiment are excellent identified and well stated.	The objectives of the experiment are clearly identified and well stated.	The objectives of the experiment are mostly identified.	The objectives of the experiment are partially identified or vague.	The objectives of the experiment are erroneous or irrelevant.	1	
Introduction	Introduction is complete and well written; provides all necessary background principles for the experiment	Introduction is nearly complete, missing some minor points	Some introductory information, but still missing some major points	Very little background information provided	Wrong information provided and not related to the experiment topic.	2	
Methodology	Excellently written the procedure with important information that are relevant to the topic.	Well written the procedure with important information that are relevant to the topic.	Averagely written the procedure consists some irrelevant information.	Averagely written the procedure consists many irrelevant information.	Poorly written the procedure consists many irrelevant information.	1	
Results	All figures, graphs, tables are correctly drawn, are numbered and contain titles/captions. All important calculation steps (if any) have been included and accurately presented.	All figures, graphs, tables are correctly drawn, but some have minor problems or could still be improved. All-important calculation steps (if any) are included but minors error is present.	Most figures, graphs, tables are correctly drawn, some still missing some important or required features. Some important calculation steps (if any) are missing.	Figures, graphs, tables contain errors or are poorly constructed, have missing titles, captions or numbers, units missing or incorrect, etc. Important calculation steps (if any) are missing.	All figures, measured data, calculations, and graphs/plots are incorrect.	5	
Discussions	All-important trends and data comparisons have been interpreted correctly and discussed, good understanding of results is conveyed	Almost all of the results have been correctly interpreted and discussed, only minor improvements are needed	Some of the results have been correctly interpreted and discussed; partial but incomplete understanding of results is still evident	Very incomplete or incorrect interpretation of trends and comparison of data indicating a lack of understanding of results.	Experiments not completed. Discussion shows wrong understanding of what the experiment is all about.	5	
Conclusion	The aim of the experiment has been achieved, the key features of the methods used and most important results are summarized.	The aim of the experiment has been achieved, most key features of the methods used and results are summarized.	A conclusion is drawn, but only supported by some experimental evidence.	A conclusion is drawn, but not supported by any experimental evidence.	No sensible conclusion. No comparisons and evidence.	3	
References, Appearance and Formatting	All sections are presented in a neat and tidy manner with consistent format and style. Complete with labelling all the figure and table. Easy to read and understand.	All sections in order well formatted, very readable.	All sections in order, formatting generally well but could still be improved.	Sections in order, contains the minimum allowable amount of handwritten copy, formatting is rough but readable	Sections out of order/ messy, too much handwritten copy, sloppy formatting, difficult to read and understand.	2
