DESCRIPTION OF COURSEWORK

Course Code	COM204
Course Name	Engineering Graphics
Lecturer	Dr. Chew Kit Wayne
Academic Session	2022/04
Assessment Title	Assignment 1

A. Introduction/ Situation/ Background Information

This assignment aims to let students utilize their engineering drawing skills to produce a proper engineering drawing. The focus of this assignment is orthographic projections and section views.

B. Course Learning Outcomes (CLO) covered

At the end of this assessment, students are able to:

CLO 1 Demonstrate knowledge and skills to prepare engineering drawing.

CLO 2 Demonstrate ability to draw orthographic projections and section using computer aided drawing (CAD) method.

C. University Policy on Academic Misconduct

1. Academic misconduct is a serious offense in Xiamen University Malaysia. It can be defined as any of the following:
   i. **Plagiarism** is submitting or presenting someone else's work, words, ideas, data or information as your own intentionally or unintentionally. This includes incorporating published and unpublished material, whether in manuscript, printed or electronic form into your work without acknowledging the source (the person and the work).
   ii. **Collusion** is two or more people collaborating on a piece of work (in part or whole) which is intended to be wholly individual and passed it off as own individual work.
   iii. **Cheating** is an act of dishonesty or fraud in order to gain an unfair advantage in an assessment. This includes using or attempting to use, or assisting another to use materials that are prohibited or inappropriate, commissioning work from a third party, falsifying data, or breaching any examination rules.

2. All the assessment submitted must be the outcome of the student. Any form of academic misconduct is a serious offense which will be penalised by being given a zero mark for the entire assessment in question or part of the assessment in question. If there is more than one guilty party as in the case of collusion, both you and your collusion partner(s) will be subjected to the same penalty.

D. Instruction to Students

The assignment should be attached with the assignment cover page and the marking rubrics. Compile the drawings into one PDF document and submit it in Moodle. Present the drawing in the unit of millimeter. Please use the appropriate layout for your drawing with title block that contains information such as name, student ID and question number (for example, Assignment 1, C1). The submission deadline is on Week 8. Late submission will not be entertained.

E. Evaluation Breakdown

No.	Component Title	Percentage (%)
1.	Orthographic projection drawing	80
2.	2D section view	20
	TOTAL	**100**

F. Task(s)

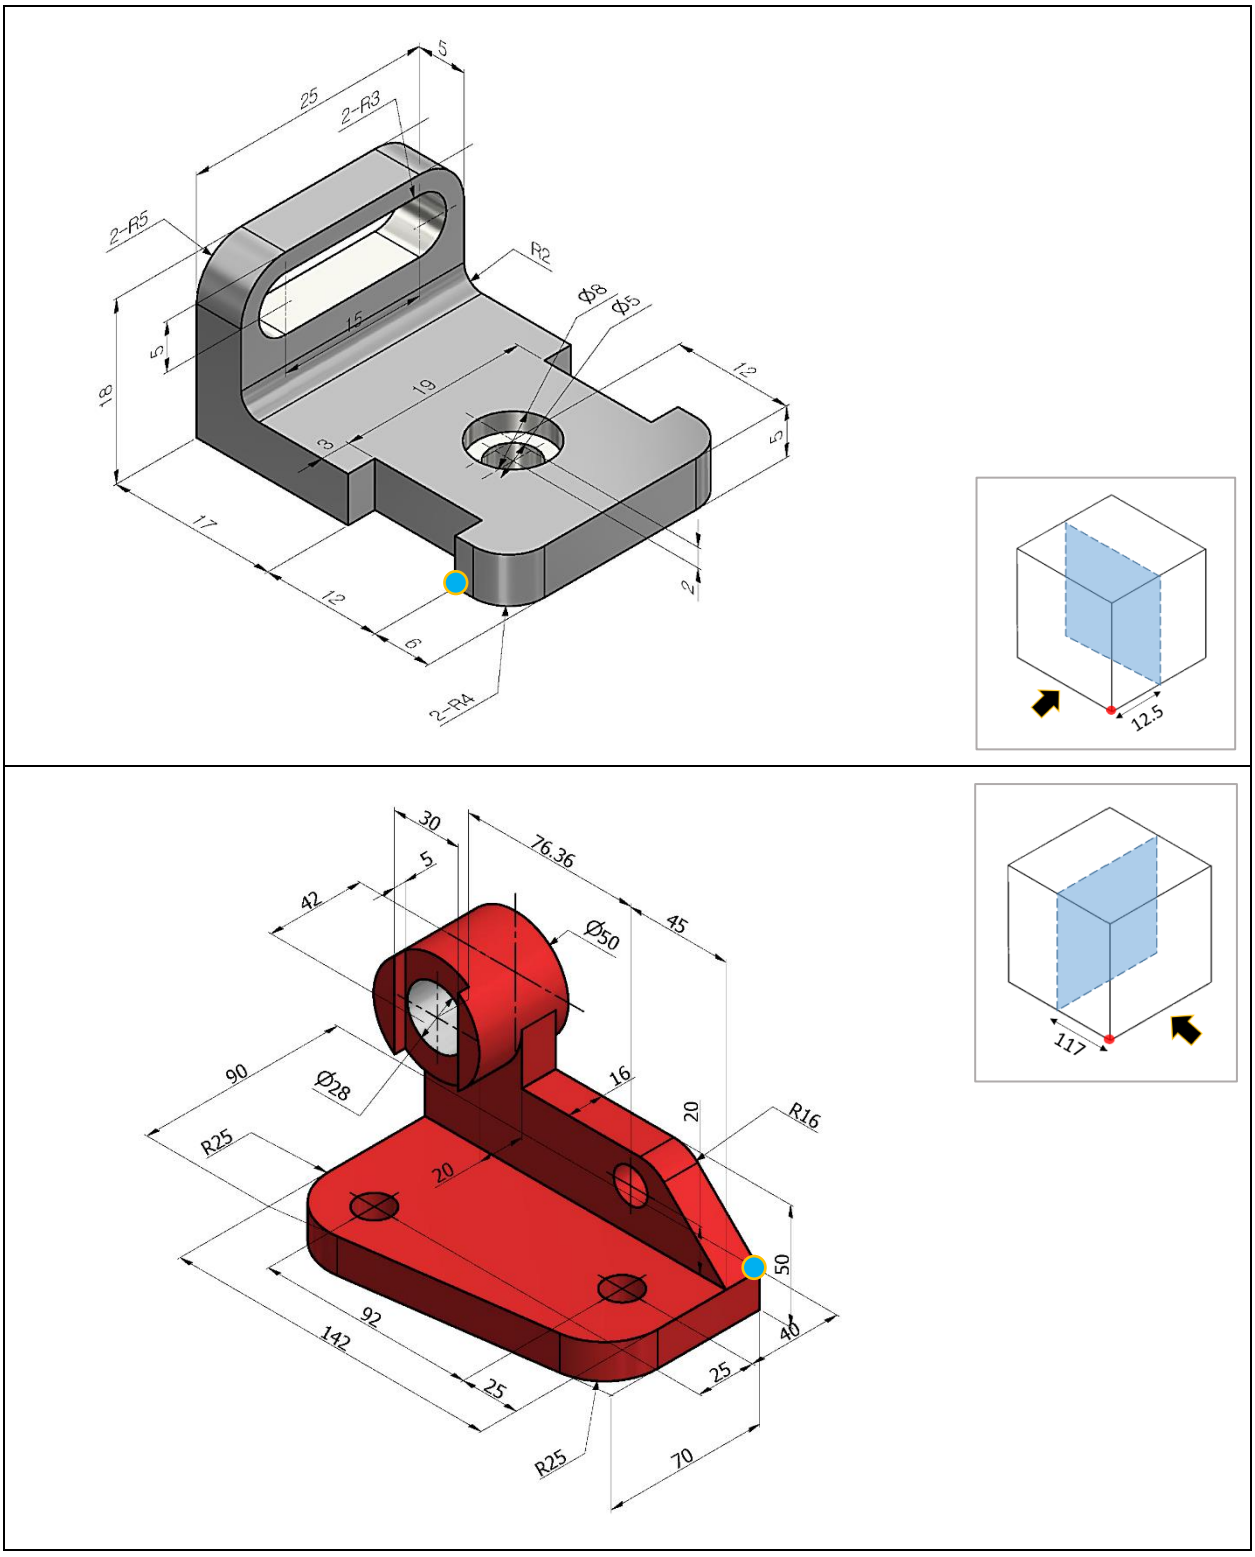

This is an individual assignment. The assignment consists of 2 components and you must complete both components.

Component 1: Draw the orthographic projections (top, side and front view) of any big electrical devices such as computer, laptop, fridge, oven, cooler and etc. using computer aided drafting (CAD) method. Please use first angle projection for your drawing. Include the name of your selected electrical device in the title block.

Provide the pictures of your electrical device in appendix (top, side and front view). In your CAD drawing, you may include internal parts of the device as additional content.

Component 2: Referring to Figure in the next section, draw the sectional view and the first angle orthographic projections using AutoCAD 2D.

Based on the choices allocated to you, select one of the two drawings and create a 2D orthographic projection with appropriate views.

APPENDIX 1

MARKING RUBRICS

Component Title	Orthographic Projection Drawing			Percentage (%)	80	
Criteria	Score and Descriptors				Weight (%)	Marks
	Excellent (4)	Good (3)	Average (2)	Need Improvement (1)		
Clarity of design	The drawing fully describes the intent of the designer. Drawing is clear and reflects what the product is.	Drawing is clear and reflects the product clearly.	Drawing is clear but the reader might be confused about what the product design.	Drawing is not clear and is not obvious about what is the product.	**12**	
Proper line type	Able to understand, set and use all the line types appropriately. All line types are drawn correctly.	Able to set and used the line types correctly with minor mistake.	Able to understand and set the line types with major mistake.	No rules were followed. Unable to set the line types. Did not use correct line type or weight.	**12**	
Proper size and title block	Drawing has an excellent appearance. Space is used to display the final drawing in a professional manner. The title block is fully edited.	Accurate print area is selected. Space is used to display the final drawing in a professional manner. The title block is only 80% completed.	The title block is only 50% completed. Space is used properly to display drawing.	Information about the drawing and the designer is not provided. The drawing size is inappropriate	**12**	
Dimensions	All dimensions are correctly shown on the drawing.	80% of dimensions are done correctly.	50% of dimensions are done correctly.	Improper and/or unnecessary dimensioning.	**16**	
Orthographic projection	The position of three views are correct. All projection lines are correct. Can differentiate the projection line from the object line easily.	The position of three views are correct. Minor mistake in the projection line. Can differentiate the projection line from the object line easily.	The position of three views are incorrect. 50% of projection lines are correct. Difficult to differentiate between the object line and projection line.	The position of three views are incorrect. Only 20% of projection lines are correct. Difficult to differentiate between the object line and projection line.	**12**	
Complexity	Different types of lines including curve, straight line and etc. are included. Drawing is complex.	Different types of lines including curve, straight line, etc. are included but mostly straight line. Above average complexity.	Different types of lines including curve, straight line, and etc. are included but mostly straight line. Average complexity.	Only straight line with simple drawing are presented. Simple.	**16**	
				TOTAL		

Component Title	2D Section View			Percentage (%)	20	
Criteria	Score and Descriptors				Weight (%)	Marks
	Excellent (4)	Good (3)	Average (2)	Need Improvement (1)		
Proper line type	Able to understand, set and use all the line types appropriately. All line types are drawn correctly.	Able to set and used the line types correctly with minor mistake.	Able to understand and set the line types with major mistake.	No rules were followed. Unable to set the line types. Did not use correct line type or weight.	**4**	
Proper size and title block	Drawing has an excellent appearance. Space is used to display the final drawing in a professional manner. The title block is fully edited.	Accurate print area is selected. Space is used to display the final drawing in a professional manner. The title block is only 80% completed.	The title block is only 50% completed. Space is used properly to display drawing.	Information about the drawing and the designer is not provided. The drawing size is inappropriate	**4**	
Dimensions	All dimensions are correctly shown on the drawing.	80% of dimensions are done correctly.	50% of dimensions are done correctly.	Improper and/or unnecessary dimensioning.	**4**	
Orthographic projection	The position of three views are correct. All projection lines are correct. Can differentiate the projection line from the object line easily.	The position of three views are correct. Minor mistake in the projection line. Can differentiate the projection line from the object line easily.	The position of three views are incorrect. 50% of projection lines are correct. Difficult to differentiate between the object line and projection line.	The position of three views are incorrect. Only 20% of projection lines are correct. Difficult to differentiate between the object line and projection line.	**8**
